### *Acknowledgements*

*The researchers would like to sincerely thank the county elections officials and staff throughout the State of California who took time to provide data to the project. Additionally, we are grateful to the Secretary of State's Office for its continuing support and interest in this project. Without their assistance, the completion of these yearly reviews and the California Elections Data Archive would not be possible.*

# CALIFORNIA ELECTIONS DATA ARCHIVE

## INTRODUCTION

The California Elections Data Archive (CEDA) is a joint project of the Center for California Studies, and the Institute for Social Research (ISR), at the California State University, Sacramento, and the office of the California Secretary of State. The purpose of CEDA is to provide researchers, citizens, public agencies, and other interested parties with a single repository of local election data. With over 6,000 local jurisdictions in California, the task of monitoring local elections is nearly impossible for individuals. CEDA addresses this problem through the creation of a single, cost-effective, and easily accessible source of local election data. CEDA includes candidate, and ballot measure results for county, city, community college, and school district elections throughout the State. CEDA thus represents the only comprehensive repository of local election results in California and one of a very few such databases on local elections in the U.S.

### How the CEDA Data is Collected and Reported

ISR staff collects election data periodically throughout each calendar year. This enables CEDA to incorporate results from special elections as well as all regularly scheduled elections. ISR staff enters election results from counties, cities, community colleges, and school districts into the CEDA database and then uses this database to generate three standard CEDA reports. These reports include:

- County Elections: Candidates, ballot designations, and vote totals for all elected county offices; vote totals and text for county ballot measures.
- City Elections: Candidates, ballot designations, and vote totals for all elected city offices; vote totals, and text for all city ballot measures.
- Community College and School District Elections: Candidates, ballot designations, and vote totals for all elective community college and school district offices; vote totals and text for all district ballot measures.

ISR staff codes ballot measures for all jurisdictions according to type (e.g., charter amendment, taxes, bond measure, initiative, etc.) and to topic (e.g., education, public safety, governance, etc.).

## THE CEDA PARTNERSHIP

### THE CENTER FOR CALIFORNIA STUDIES

Located at California State University, Sacramento, the Center for California Studies is a public policy, public service, and curricular support unit of the California State University. The Center's location in the state Capital and its ability to draw upon the resources of the entire State University system give it a unique capacity for making contributions to public policy development, and the public life of California. Center programs cover four broad areas: administration of the nationally known Assembly, Senate, Executive, and Judicial Administration Fellowship Programs; university-state government liaison and applied policy research; civic education and community service through forums, conferences, and issue dialogues; and curricular support activity in the interdisciplinary field of California Studies.

### INSTITUTE FOR SOCIAL RESEARCH

Established in 1989, the Institute for Social Research (ISR) at California State University, Sacramento (CSUS) is a multidisciplinary institute that is committed to advancing the understanding of the social world through applied research. The Institute offers research expertise and technical assistance serving as a resource to agencies, organizations, the University, and the broader community. Utilizing quantitative and qualitative methods, ISR produces various types of assessments, program and policy evaluations, survey research, workload studies, and specialized analyses. Services include research design, sampling design, data collection and coding, computer-assisted telephone and field interviewing, mailed and online surveys, focus groups, database management, and statistical analysis. ISR has completed hundreds of projects with more than 50 federal, state and community agencies, private firms, and many academic units. Faculty affiliates of the Institute offer specific content expertise in a wide variety of disciplines, including the social sciences, health and human services, and education.

### CALIFORNIA SECRETARY OF STATE

Among their other duties, the Secretary of State acts as California's chief elections officer with the responsibility of administering the provisions of the Elections Code. The Secretary must compile state election returns, and issue certificates of election to winning candidates; compile the returns and certify the results of initiative and referendum elections; certify acts delayed by referendum, and prepare and file a statement of vote. Recent legislation permits but does not mandate that the Secretary of State compile local election results.
